WORK HISTORY

Ron Skill, Coimbatore (Remote) <i>Data Analyst Intern</i> - Automated data cleaning workflows in Excel and SQL, reducing manual processing time by 30% and improving reporting accuracy. - Built Power BI dashboards tracking 10+ KPIs, which improved decision-making speed by 40% for management. - Wrote SQL queries to extract data from databases for reporting and ad-hoc analysis. Cleaned and transformed datasets using Python (Pandas) to prepare data for visualization.	Coimbatore (Remote)
Vinsup Infotech, Chennai (Remote) <i>Data Analyst Intern</i> - Performed data mining and exploratory analysis on operational datasets. Designed performance metrics and KPI frameworks for business monitoring. - Built automated ETL workflows for reporting pipelines. Generated daily, weekly, and monthly operational reports for stakeholders. - Optimized SQL queries and automated data processing workflows, reducing reporting time and improving the efficiency of data analysis tasks. - Assisted in analyzing business data to identify trends, anomalies, and performance metrics that supported strategic planning and operational improvements.	Chennai (Remote)

SKILLS

- SQL(Joins, Subqueries, Window Functions, Aggregations (COUNT, SUM, AVG), GROUP BY, HAVING, Query Optimization, Data Extraction)
- Python (Pandas, NumPy, Matplotlib, Seaborn)
- Business Intelligence
- Advanced Excel (Pivot Tables, VLOOKUP, IF, Macros, COUNTIF, SUMIF, Data validation & conditional formatting)
- Data Cleaning & Workflow Automation
- Power BI & Tableau (Interactive Dashboards, KPIs, Data Visualization, Dax)

DATA ANALYTICS PROJECTS

Sales Performance Dashboard – Power BI

Tools Used: Power BI, Excel, Data Visualization, KPI Analysis

Analyzed a retail sales dataset and built an interactive **Power BI dashboard** to track key performance indicators such as total sales, profit margins, and regional performance. Cleaned and transformed data using Excel and Power Query, and created dynamic visualizations to identify sales trends and top-performing products. The dashboard helped simulate real-time business insights for decision-making.

Customer Segmentation Analysis – Python

Tools Used: Python, Pandas, NumPy, Matplotlib, Data Cleaning, Exploratory Data Analysis

Performed **customer behavior analysis** using Python to identify purchasing patterns and segment customers based on spending habits. Cleaned and processed data using **Pandas**, and created visualizations using **Matplotlib and Seaborn** to identify trends and patterns in customer transactions.

Retail Sales Data Analysis – SQL

Tools Used: SQL, Data Analysis, Query Optimization, Business Intelligence

Analyzed a retail sales database using **SQL queries** to extract insights about revenue trends, top-selling products, and customer purchasing behavior. Used joins, aggregations, and window functions to generate business reports and identify opportunities for improving sales performance.
